# ABOUT NATURAL LENSES

Natural effect contact lenses are becoming a sought after beauty accessory due to their simple-to-use nature and their impressive visual effects. The realistic style of a natural contact lens can totally transform a person's look; bringing new emphasis to their stare and complimenting new aspects of appearance and complexion.

These styles of contact lenses can offer enhancements or coverage. Enhancing styles add new colours to your current iris; subtly changing their look and adding new undertones.

Contacts that offer increased coverage feature more intense designs that enhance darker eyes by providing further colour depth and bolder edge definition.

## GORGEOUS NATURAL COLOUR

The high-quality pigment allows for detailed natural designs that can provide a realistic colourful effect, whilst maintaining a visually natural look.

## SOFT CONTACT LENSES

Made from super soft materials, these contact lenses are sure to feel as natural as they look. The lenses feel lightweight, breathable and comfortable to wear.

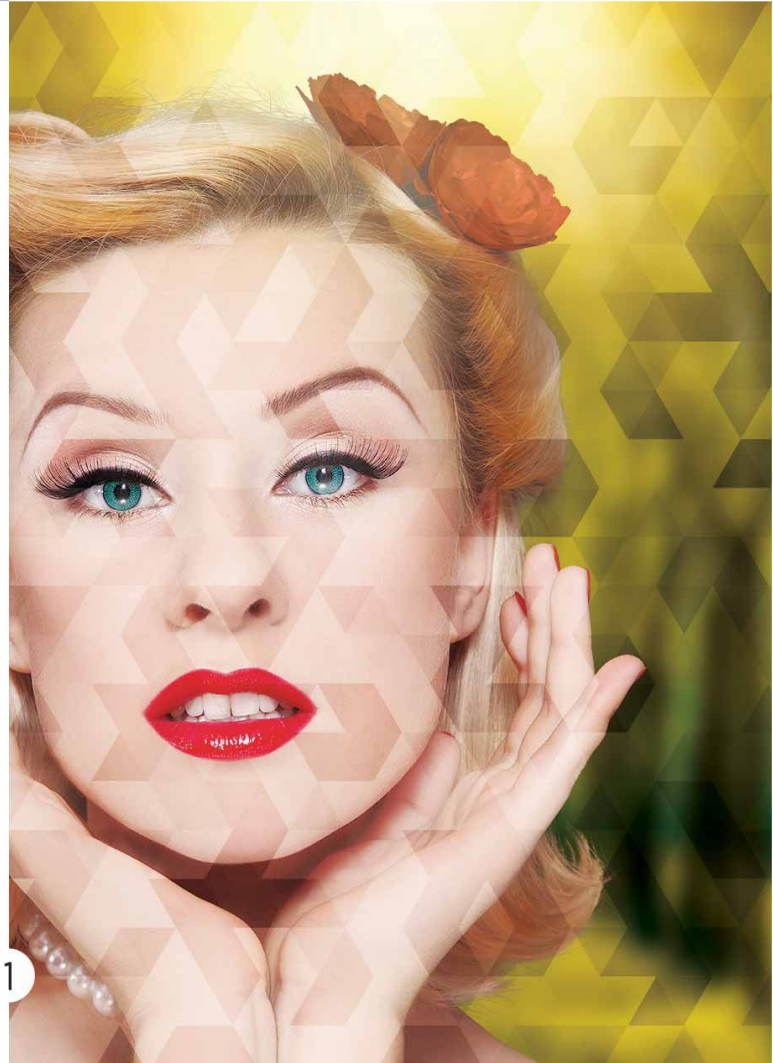

## SUITED FOR DARKER EYES

Many lenses have more detailed designs that offer an increased coverage over naturally darker eyes. This unlocks a greater range of possibilities for those with dark brown eyes.

## CHOOSE YOUR DURATION

With various durations available, you'll be able to select a pair of contacts suited directly to your needs. Choose from daily, 30 day or 90 day contact lenses.
